PRELIMINARY Event program

AOCMF Masters Course—Soft Tissue Reconstruction, Improving Functional and Aesthetic Outcomes

December 10–13, 2017 Davos, Switzerland

Lecture hall: PIscha-Parsenn
Floor plan
The first AO Course was held in Davos in 1960—these early courses pioneered psychomotor techniques by teaching practical skills of AO Techniques. Since those early days over 455,000 surgeons and 155,000 ORP from over 110 countries have attended AO Courses.

Mission

Our mission is to continuously set standards in postgraduate medical education and to foster the sharing of medically guided expertise in a worldwide network of healthcare professionals to improve patient care in trauma or disorders of the musculoskeletal system.

The AO principles of fracture management

1. Fracture reduction and fixation to restore anatomical relationships.
2. Fracture fixation providing absolute or relative stability, as required by the “personality” of the fracture, the patient, and the injury.
3. Preservation of the blood supply to soft-tissues and bone by gentle reduction techniques and careful handling.
4. Early and safe mobilization and rehabilitation of the injured part and the patient as a whole.
Welcome to AOCMF’s Masters Courses Davos 2017

Dear Colleagues,

On behalf of AOCMF and our international faculty, we would like to welcome you to the Davos Courses 2017—AO Foundation’s flagship event of the year—taking place from December 3–14. The AOCMF Masters Courses have been developed in response to the demand for more intense training for very experienced surgeons, and they provide access to the world’s leading experts in facial surgery across the specialties.

Each course is limited to a maximum number of 36 surgeons, providing participants with a remarkable learning opportunity where you will debate cases in small groups, discuss problems, develop your skills, and hear the latest practices and evidence.

Develop your skills during the hands-on practical exercises on human anatomical specimens. Designed to address the latest techniques and surgical best practices, these AOCMF Masters Courses enable you to expand your knowledge and build upon your clinical expertise in an extraordinary learning environment.

AOCMF Davos Courses: 10–13 December, 2017
• AOCMF Masters Course—Facial Trauma, Challenges and Controversies
• AOCMF Masters Course—Orthognathic Surgery, Challenges and Controversies
• AOCMF Masters Course—Soft Tissue Reconstruction, Improving Functional and Aesthetic Outcomes

In addition to these exceptional courses, the Davos Courses 2017 provide numerous opportunities to share knowledge, and to network and connect with friends and colleagues. You can also visit the AO Center showcasing all research and clinical division activities across the entire AO Foundation. You can also become an official member of the AO network, which is one of the most extensive networks of more than 19,000 surgeons practicing, teaching, researching, and learning worldwide with the ultimate goal of improving patient care.

We wish you an outstanding experience at the AOCMF Masters Courses 2017 in Davos.

Sincerely,

Stefano Fusetti
Chair, AOCMF Masters Courses 2017

Max Heiland
Chair, AOCMF Masters Courses 2017
Goal of the course

This AOCMF Masters Course focuses on state-of-the-art techniques and best practices at a masters level. Expert tips and tricks, simple and complex soft tissue reconstruction strategies, and clinical controversies will be addressed.

Target participants

This course is for certified surgeons with 5–10 years experience in surgery across the craniomaxillofacial specialties (including oral and maxillofacial surgery, ENT, head and neck, plastic, oculoplastics, ophthalmology, and neuro and general surgery). This is NOT a resident level course. It is targeted at participants who want to improve their knowledge or specialization in the management of complex patient problems in the field of CMF.

Learning objectives

Upon completion of the course, the participant will be able to:

• Recognize the challenges and limitations in management of the soft tissue envelope
• Perform the key steps in the current state-of-the-art approaches to the craniofacial skeleton including tips and tricks in order to prevent and reduce post-operative complications
• Apply the current treatment options for managing scar contracture and soft tissue deformity of the facial complex

Course description

Topics of the course will be taught in three main ways. Lectures will concentrate on the introduction of core material. Small group discussions will be case-based and will be used to elaborate on the core content introduced through lectures. Practical sessions performed on cadaveric specimens will teach common surgical approaches, soft tissue handling and reconstruction, and incision closure techniques. Discussions will be held throughout the course to link the lecture material and practical skills taught with the problems encountered by the course participants in their individual practice.
Course Chairs

Thiam-Chye Lim
National University Hospital, Singapore

Damir Matic
London Health Sciences Centre, University of Western Ontario, Canada

International Faculty

Muriel Brix
Hôpital Central, Nancy, France

Andrew Carton
Monklands Hospital, Airdrie, United Kingdom

Michael Grant
Shock Trauma Center, University of Maryland School of Medicine, Baltimore, USA

Satyesh Parmar
Queen Elizabeth Hospital, Birmingham, United Kingdom

Michael Rasse
Universitätsklinik für Mund-, Kiefer- und Gesichtschirurgie, Innsbruck, Austria

Umberto Zanetti
Ospedali Civili di Brescia, Brescia, Italy

Guest Faculty

Neal Futran
University of Washington School of Medicine, Seattle, USA

Gorman Louie
University of Alberta, Edmonton, Canada

Warren Schubert
University of Minnesota, St Paul, USA

Guest

Yves Harder
Regional Hospital of Lugano, Lugano, Switzerland

Guest Speaker

Daniel Buchbinder
Icahn School of Medicine at Mount Sinai, New York, USA

Guglielmo Ramieri
A.O.U. Città della Salute e della Scienza di Torino, Torino, Italy

Florian Thieringer
University Hospital Basel, Switzerland

Event organization

AO Foundation
AOCMF
Sarah Groves
Clavadelerstrasse 8
7270 Davos, Switzerland
Phone +41 81 414 25 53
Fax +41 81 414 22 80
Email sarah.groves@aocmf.org
www.aocmf.org

AO funding sources
Unrestricted educational grants from different sources are collected and pooled together centrally by the AO Foundation. All events are planned and scheduled by local and regional AO surgeon groups based on local needs assessments. We rely on industrial/commercial partners for in-kind support to run simulations/skills training if educationally needed.
General information

Event registration
Please register online at:
http://DAVOS1217_MASTERSST.aocmf.org

Event fee
AOCMF Masters Course—Soft Tissue Reconstruction, Improving Functional and Aesthetic Outcomes:
CHF 3,600.–
Included in the event fee are conference bag with documentation, coffee breaks, lunches, AO World Night and course certificate.

European CME Accreditation
An application has been made to the UEMS—EACCME® in Brussels for CME accreditation of this event.

Swiss CME Accreditation
Additionally an application has been made to the following Swiss society:
Die Schweizer Chirurginnen and Chirurgen (SGC/SSC)

Course certificate
The course certificates will be available at the end of the event at the welcome desk.

Evaluation guidelines
All AOCMF events apply the same evaluation process, online (pre- and post-event evaluation) and on-site by paper and pencil questionnaires. This helps AOCMF to ensure that we continue to meet your training needs.

Intellectual property
Course materials, presentations, and case studies are the intellectual property of the course faculty. All rights are reserved. Check hazards and legal restrictions on www.aofoundation.org/legal.

Recording, photographing, or copying of lectures, practical exercises, case discussions, or any course materials is absolutely forbidden.
The AO Foundation reserves the right to film, photograph, and audio record during their events. Participants must understand that in this context they may appear in these recorded materials. The AO Foundation assumes participants agree that these recorded materials may be used for AO marketing and other purposes, and made available to the public.

Security
There will be a security check at the entrance of the building. Wearing of a name tag is compulsory during lectures, workshops, and group discussions.

No insurance
The course organization does not take out insurance to cover any individual against accidents, theft, or other risks.

Use of mobile phones
Use of mobile phones is not allowed in the lecture halls and in other rooms during educational activities. Please be considerate of others by turning off your mobile phone.

Picture Gallery
Check out aodavoscourses.org for a daily selection of pictures from the Davos Courses, the best from last year's courses, and a selection of photographs from the first ever AO Davos Courses.

Dress code
Davos: warm clothes and suitable shoes are advisable.

Wireless network

How to connect to the AO Wireless LAN
• Open the wireless network connection window
• Choose the AO Business network as shown in the printscreen below and click on the Connect button

• Our "AO Business" wireless network requires a WPA network key:
  Network key: aowireless

• Then click on the OK button
AO Foundation—Principles of AO Educational Events

1) Academic independence
Development of all curricula, design of scientific event programs, and selection of faculty are the sole responsibilities of volunteer surgeons from the AO network. All education is planned based on needs assessment data, designed and evaluated using concepts and evidence from the most current medical education research, and involving the expertise of the AO Education Institute (www.aofoundation.org).

Industry participation is not allowed during the entire curriculum development and planning process to ensure academic independence and to keep content free from bias.

2) Compliance to accreditation and industry codes
All planning, organization, and execution of educational activities follow existing codes for accreditation of high-quality education:
• Accreditation Criteria of the Accreditation Council for Continuing Medical Education, USA (www.accme.org)
• ACCME Standards for Commercial Support: Standards to Ensure Independence in CME Activities (www.accme.org)
• Criteria for Accreditation of Live Educational Events of the European Accreditation Council for Continuing Medical Education (www.uems.eu)

Events that receive direct or indirect unrestricted educational grants or in-kind support from industry also follow the ethical codes of the medical industry, such as:
• Eucomed Guidelines on Interactions with Healthcare Professionals (www.medtecheurope.org)
• AdvaMed Code of Ethics on Interactions with Health Care Professionals (www.advamed.org)
• Mecomed Guidelines on Interactions with Healthcare Professionals (www.mecomed.org)

3) Branding and advertising
No industry logos or advertising (with the exception of the AO Foundation and AO Clinical Division) are permitted in the area where educational activities take place.

Sponsors providing financial or in-kind support are allowed to have a promotional booth or run activities outside the educational area with approval from the event chairperson.

4) Use of technologies and products in simulations
If case simulations are chosen as an educational method to educate skills, we only use technology approved by the AOTK System (AOTK)—a large independent group of volunteer surgeons developing and peer-reviewing new technology (more information about AOTK, its development and approval process can be found on the AO Foundation website: www.aofoundation.org).

5) Personnel
Industry staff is not allowed to interfere with the educational content or engage in educational activities during the event.
AO Research Institute Davos (ARI)

Mission
Excellence in applied Preclinical Research and Development within trauma and disorders of the musculoskeletal system and translation of this knowledge to achieve more effective patient care worldwide.

Goals
- Contribute high quality applied Preclinical Research and Development focused towards clinical applications/solutions.
- Investigate and improve the performance of surgical procedures, devices and substances.
- Foster a close relationship with the AO medical community, academic societies, and universities.
- Provide research environment/support/training for AO clinicians.

At the AO World booths, meet with our team including our ARI Medical Research Fellows, establish contacts, freely discuss your clinical problems, ideas, and learn about the latest results from the AO Research Institute Davos (ARI). Insight into the AO Center will show our infrastructure under one roof and enable you to meet some of our research team.

Areas:

Collaborative Research Programs
- Annulus Fibrosus Rupture
- Acute Cartilage Injury

Craniomaxillofacial
- Imaging and planning of surgery, computer aided preoperative planning
- Medication-Related Osteonecrosis of the Jaw
- Bone Regeneration

Spine
- Degeneration and regeneration of the intervertebral disc
- Fracture fixation in osteoporotic bone

Trauma
- Bone infection, including the development and testing of active anti-infective interventions
- Fracture fixation in osteoporotic bone including intraoperative assessment of bone quality, augmentation techniques and prophylaxis
- Evaluation of the cortical and trabecular bone remodeling (with special regards to the porosity) in the proximal humerus and its impact on the fracture zones
- Development of smart surgical instruments and implant concepts for optimized bone healing
- Patient outcomes and biomarkers

Veterinary Medicine
- Improving osteosynthesis for small and large animals

Multidisciplinary
- Analysis of implant-specific functional anchorage with CT-technology
- Ex vivo testing using advanced biomechanical models
- In vivo studies using established or newly developed preclinical models
- Gene transfer- non-viral and viral
- Implant design using the Finite Element Methods
- Implant positioning assistance, C-arm guided implant placement
- Telemetric monitoring of bone healing
- In vivo and in vitro quantification of bone turnover and scaffold degradation
- Longitudinal analysis within in-vivo studies using CT-technology
- Medical image processing and analysis
- Polymers to deliver cells and biological factors, create potential space for tissue development and guide the process of tissue regeneration
- Prototype development and production
- Stem cell therapies for the treatment of bone, intervertebral disc and cartilage defects
- Bioreactor culture systems and mechanobiology
- Surface modification of PEEK to improve tissue integration
- Thermosresponsive gel for delivery of antibiotics, stem cells, growth factors, transfected cells etc.
- 3R – refinement of preclinical studies
- Development, standardization, optimization and improvement of preclinical models and methods

For the 2016 AO Research Institute Davos activity report and recent publications go to: www.aofoundation.org/ari/publications
Sponsors

We thank our major industry partners DePuy Synthes and Siemens for contributing in-kind support (material and logistics) without which this event would not be possible.
A special thanks to DePuy Synthes and Siemens for providing an unrestricted educational grant for this event.

We also extend our thanks to the following co-sponsors (educational grants, in-kind support):
Credit Suisse
Synbone
Ethicon

Upcoming AO Courses—Davos 2018

AO Courses—December 2–7, 2018
• AO Trauma Course—Basic Principles of Fracture Management
• AO Trauma Course—Advances Principles of Fracture Management
• AO Trauma Course—Advanced Principles of Fracture Management for Swiss Residents
• AO Trauma Masters Course—Current Concepts
• AO Trauma Course—Foot and Ankle
• AO Trauma Course—Pediatrics
• AO Trauma Masters Kurs
• AO Recon Course

AO Courses—December 9–13, 2018
• AO Trauma Course—Basic Principles of Fracture Management for Swiss Surgeons
• AO Spine Courses
•AO CMF Courses
• AO Neuro Course
• AO VET Courses

List subject to changes. The final Davos courses list as well as worldwide courses lists will be available on www.aocmf.org in January 2018.
