Traditionally, each specialty involved in craniomaxillofacial trauma and orthognathic surgery had its own areas of interest and expertise. This introductory textbook is different in that it presents the combined and focused expertise and competence of the different specialties on the entire craniofacial skeleton.

The principles described in this textbook represent the evolution of craniomaxillofacial buttress reconstruction over the last 60 years. In addition to standard procedures, techniques representing recent surgical advances and new developments are introduced.

This textbook not only provides an overview on current concepts of craniomaxillofacial trauma care and orthognathic surgery, but also helps to understand the complexity of the craniofacial skeleton and its related soft tissues for an efficient and successful reconstruction of the face following trauma and congenital deformities.
Table of contents

1 General aspects
   1.1 Introduction
   1.2 Bone
   1.3 Fractures in the craniomaxillofacial skeleton
   1.4 Implant materials and types
   1.5 Principles of craniomaxillofacial trauma care
   1.6 References and suggested reading

2 Mandibular fractures
   2.1 Symphyseal and parasymphyseal fractures
   2.2 Body and angle fractures of the mandible
   2.3 Condyle, ascending ramus, and coronoid process fractures
   2.4 Fractures in bone of reduced quality
   2.5 References and suggested reading

3 Midfacial fractures
   3.1 Lower midface (Le Fort I and palatal fractures)
   3.2 Upper midface (Le Fort II and III)
   3.3 Zygomaticomaxillary complex (ZMC) fractures, zygomatic arch fractures
   3.4 Orbital fractures
   3.5 Nasoorbitoethmoidal (NOE) fractures
   3.6 Fractures of the nasal skeleton
   3.7 References and suggested reading

4 Skull and skull base fractures
   4.1 Frontal sinus, frontal bone, and anterior skull base
   4.2 Lateral skull base fractures
   4.3 Cranial vault fractures
   4.4 References and suggested reading

5 Panfacial fractures

6 Fractures in the growing skeleton

7 Fixation techniques of standard osteotomies of the facial skeleton (orthognathic surgery)
   7.1 Definitions, diagnosis, and treatment planning
   7.2 Standard osteotomies in the mandible
   7.3 Standard osteotomies in the maxilla
   7.4 Special considerations and sequencing in 2-jaw osteotomies
   7.5 Perioperative and postoperative management
   7.6 Complications and pitfalls
   7.7 References and suggested reading
